

Is Health Insurance Alone Enough To Cover The Financial Risk?

What Causes Overnight Hospital Stays?

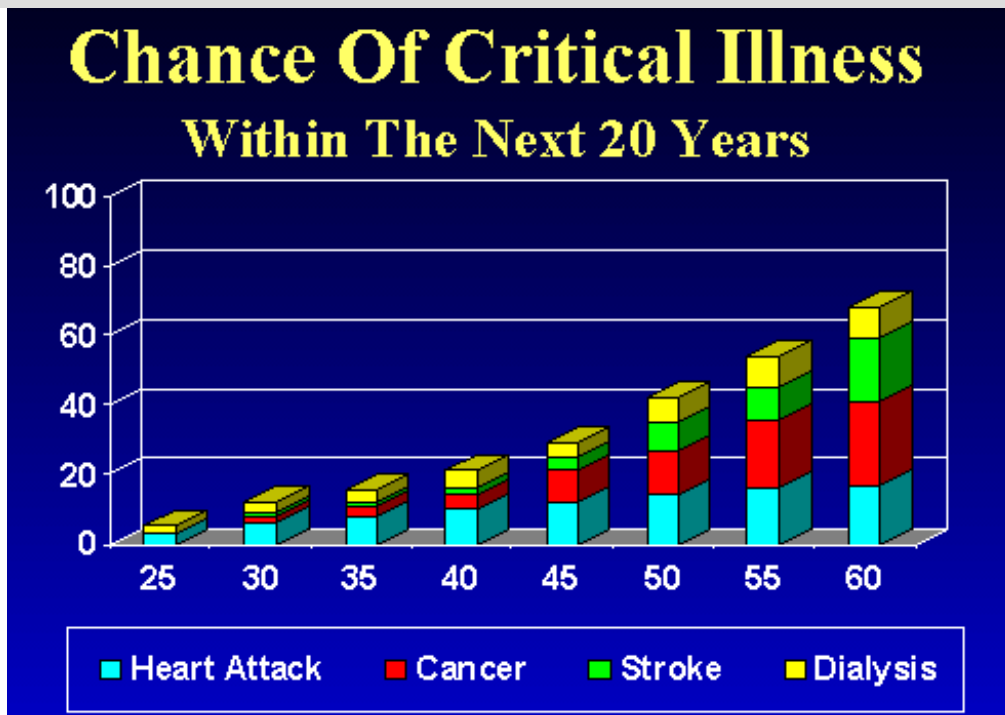

- Accidental Injury
- Critical Illness
- Other

*** 68% Of Overnight Hospital Stays ***

How likely is it?

While an average 40 year old has only 1 in 5 chance to suffer a critical illness in the next 20 years, for a 50 year old this chance is already 1 to 2.5. Notice that only the most frequent critical illnesses are considered here.

Heart Attack, Cancer, Stroke, Paralysis, Organ Transplants, Coronary Bypass, Kidney Failure/Dialysis, Blindness, Benign Brain Tumor, Alzheimer's, HIV from Blood Transfusion, Parkinson's, Aorta Graft, Heart Valve Replacement
